## Remarks from the Editor

Anthony Upchurch

**American Textile** is very pleased to introduce a new chemical product, **SurfTechs 4589**. This product is an excellent performing, yet low cost, polyester polymer specifically formulated for use as an anti back staining agent in garment wet processing of denim.

## SurfTechs 4589

**SurfTechs 4589** is a 100% active solid concentrate polyester polymer product. The product is designed as a concentrate product for use by formulators. The product must be dispersed in water prior to use. It may be dispersed in water alone or dispersed in water and formulated with surfactants such as wetters, detergents and dispersants.

**SurfTechs 4589** is a very economical product – costing about 20% less compared to conventional polyester polymers – but performing in a similar manner.

## Summary of the Advantages of SurfTechs 4589

- Very Economical to Use
- 100% Active / Solid
- Packaged in Metal Drums for Easy Melting
- Disperses Readily in Water
- Is Compatible with a Wide Range of Surfactants
- Eliminates Dye Back Staining on Polyester and Polyester / Cotton Pocketing
- Works Well on Sulfur and Indigo Dye

If you have interest in this product, please let us know and we can discuss further.

Samples are available upon request.
