

Technical Bulletin

SurfTechs 4001

DESCRIPTION

SurfTechs 4001 is polyvinyl acetate polymer for use as a stiffening agent and hand builder. The product is compatible with various catalyst and resin finishing systems. It is also compatible with water repellants. It is durable to repeated home launderings.

SurfTechs 4001 is a concentrated off-white liquid product. It is highly recommended for use as a fabric hand builder, label stiffening agent and rope finish.

BENEFITS

SurfTechs 4001 has the following beneficial characteristics.

- Concentrated
- Economical Use
- Lends Stiffness
- Compatible with Many Catalysts
- Compatible with Most Finishes
- Durable to Repeated Washing

TYPICAL PROPERTIES

Color	Opaque Off-White
Texture	Liquid
Odor	Mild
Specific Gravity	About 1.1
Solids	About 55%

PREPARATION

SurfTechs 4001 may be used as is. Not pre-dilution is required.

APPLICATION

The product may be applied by pad at a dosage rate designed to lend the final desired stiffness.

STORAGE

SurfTechs 4001 should be stored in a cool, dry and well-ventilated area.

HANDLING

Follow good industrial hygiene when handling **SurfTechs 4001**. Please refer to the Material Safety Data Sheet for details.

PACKAGING

SurfTechs 4001 is available in 55-gallon drums.
