

Technical Bulletin

WashTechs 7425

DESCRIPTION

WashTechs 7425 is a concentrated powder polyester polymer with a surfactant component that performs very well as anti back staining agent for cotton and polyester/cotton garments.

WashTechs 7425 is highly recommended for use as an anti back staining agent for indigo dyed garments of 100% cotton and polyester/cotton pockets in these garments. The product is also suggested for use in fully formulated abrasion aids as a component to enhance contrast by reducing indigo back staining.

BENEFITS

WashTechs 7425 has the following beneficial characteristics.

- Economical to Use - Concentrated
- Stops Back Staining on Cotton and P/C
- Very Good Indigo Dye Dispersant
- Compatible with Most Chemicals

TYPICAL PROPERTIES

| | |
|--------------|------------------|
| Color | Off White Powder |
| Texture | Powder |
| Odor | Polymer |
| Ionic Nature | Nonionic |
| Solids | About 97% |

PREPARATION

WashTechs 7425 may be used as is. It may also be diluted with water prior to use. Dilute 1 part **WashTechs 7425** with 4 parts water, heat and mix thoroughly.

APPLICATION

General dosage rates are as follows for **WashTechs 7425** (without dilution).

| | |
|----------|-----------------|
| Desize | 0.10 – 0.3% OWG |
| Abrasion | 0.05 – 0.2% OWG |
| Clean Up | 0.10 – 0.3% OWG |

Typical fully formulated abrasion aids may contain 5 – 50% **Surf Techs 4586**. Normally, less is used with neutral cellulase (5 – 20%) and more with acid cellulase (20 – 50%).

STORAGE

WashTechs 7425 should be stored in a cool, dry and well-ventilated area.

HANDLING

Follow good industrial hygiene when handling **WashTechs 7425**. Please refer to the Material Safety Data Sheet for details.

PACKAGING

Surf Techs 4586 is available in 25 kg bags.
